

M NIHAL ALI

Junior AI Engineer — LLM Pipelines · Multi-Agent Systems · Production ML

Kozhikode, Kerala | Relocating to Bangalore | +91 90371 85443 | niham03@gmail.com | [linkedin.com/in/m-nihal-ali](https://www.linkedin.com/in/m-nihal-ali) | github.com/niham03-collab

SUMMARY

AI Engineer with 1+ year designing and deploying LLM-powered voice and automation systems in Python. Built multi-agent architectures on Azure OpenAI and Google Gemini, deployed 7-microservice platforms on Docker and Azure, and shipped full-stack products using Next.js and Supabase.

EXPERIENCE

Junior AI Engineer — Codely.ai (DialoGen Platform), Kozhikode Jan 2026 – Present

- Ship production LLM pipelines on **Azure OpenAI (GPT-4o)** and **Google Gemini**, handling 1,000+ real-time voice conversations/month with automatic provider failover.
- Build a **provider-agnostic AI engine** abstracting **5 STT, 3 TTS, and 2 LLM** services with zero-downtime model swaps via config.
- Implement **multi-agent Generator + Critic loops (LangChain)** for script generation, cutting manual revision cycles by **~3x** using LLM-driven feedback loops.
- Engineer **Generative AI** prompt pipelines with Pydantic validation, guardrails, and **RAG-ready** retrieval hooks, reducing invalid/hallucinated responses by **~50%**; deploy 7 microservices via Docker and Azure Pipelines CI/CD.

AI/ML Engineer Intern — Luminar Technolab, Kochi Jun 2025 – Jan 2026

- Fine-tuned NLP models with **scikit-learn, TensorFlow, and Hugging Face Transformers** across 10+ datasets, achieving **90%+ accuracy**; built XGBoost classifiers and Power BI / Streamlit dashboards.
- Developed core modules of an early-stage GenAI voice prototype, integrating STT/TTS APIs with LLM inference in a low-latency audio pipeline.

PROJECTS

AI Cold Caller Simulator 2026

Python, FastAPI, Gemini, ElevenLabs, Sarvam STT, LangChain

- Voice-based sales training simulator with a Hindi-speaking AI prospect “Raj Sharma” — **7+ objection scenarios**, Hinglish persona, and a STT/TTS pipeline with **<800ms response latency**.
- Designed state-machine prompting on Gemini for natural objection handling; integrated Sarvam STT and ElevenLabs TTS for native Hinglish voice rendering.

DialoGen — Generative AI Voice Platform 2025

Python, FastAPI, LangChain, Azure OpenAI, Gemini, Pipecat, Twilio, RabbitMQ, Docker, Next.js, Prisma

- Production voice AI system: LLM conversations, agentic script orchestration, CRM integrations, and enterprise campaign management across **7 microservices**.
- Architected RabbitMQ-based message bus connecting Twilio telephony, Pipecat audio pipeline, and LangChain agents; reduced inter-service latency by **~40%**.

AI-SDR — Automated Sales Development Platform 2025

Python, FastAPI, Next.js, TypeScript, Prisma, RabbitMQ, LangChain, Docker, Azure Pipelines

- AI-powered SDR platform with lead scoring, schedule-compliant outreach, AI-driven campaign execution, and **sub-60s speed-to-lead** across **3+ enterprise tenants**.
- Built Next.js + Prisma dashboard for campaign metrics, lead pipeline visualization, and per-tenant compliance configuration.

Golden Hardwares — Inventory & Sales Management Web App 2026

Next.js 14, TypeScript, Tailwind CSS, Supabase (Postgres, Auth, RLS)

- Web application managing **200+ SKUs**: inventory, billing, ledger, bill printing, revenue analytics, and audit history secured with **Supabase Auth + Row-Level Security**.
- Implemented thermal bill printing, daily revenue ledger with date-range filters, and low-stock alerts; deployed serverless on Vercel.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
AI / GenAI	Azure OpenAI (GPT-4o), Google Gemini, LangChain, Prompt Engineering, Multi-Agent Systems, RAG, Hugging Face Transformers
ML / NLP	scikit-learn, TensorFlow, XGBoost, NLTK, Text Classification, Model Fine-Tuning
Backend / Front	FastAPI, Flask, Pydantic, Prisma ORM, RabbitMQ Next.js 14, React, Tailwind CSS, Streamlit
Cloud / DevOps	Azure (OpenAI, Pipelines, DevOps), Docker, Git, CI/CD, Vercel
Data	PostgreSQL, Supabase, Pandas, NumPy, Power BI

EDUCATION

B.Tech, Computer Science & Engineering — Jyothi Engineering College, Thrissur (KTU) 2021 – 2025

CERTIFICATIONS

Data Science Professional — Luminar Technolab | Python for Data Science — Coursera
