

M NIHAL ALI

Software Engineer — Python · Backend · Full-Stack

Kozhikode, Kerala | Open to Hyderabad / Bangalore | +91 90371 85443 | nihalm03@gmail.com | [linkedin.com/in/m-nihal-ali](https://www.linkedin.com/in/m-nihal-ali) | github.com/nihalm03-collab

SUMMARY

Software Engineer with 1+ year writing production-grade Python for backend services, APIs, and full-stack web applications. Build modular, testable code with FastAPI, Pydantic, and RabbitMQ; deliver in agile sprints with Git, Docker, and CI/CD on Azure Pipelines. Experienced in scalable microservice architectures and full-stack development with Next.js and PostgreSQL.

EXPERIENCE

Junior AI Engineer (Python Backend) — Codely.ai, Kozhikode

Jan 2026 – Present

- Develop and ship production **Python microservices on FastAPI** handling 1,000+ real-time requests/month with health monitoring and provider failover.
- Design modular Python architecture abstracting third-party APIs (5 STT, 3 TTS, 2 LLM providers), enabling zero-downtime swaps via config-driven dependency injection.
- Build asynchronous, event-driven workflows using **RabbitMQ** across **7 microservices**; collaborate in agile sprints with product, QA, and DevOps teams.
- Write clean, type-checked Python with **Pydantic** validation, unit tests, and structured logging; deploy via **Docker** and **Azure Pipelines CI/CD**.

Software / ML Engineer Intern — Luminar Technolab, Kochi

Jun 2025 – Jan 2026

- Built data-processing pipelines in **Python** (Pandas, NumPy) across 10+ datasets; trained scikit-learn / TensorFlow models reaching **90%+ accuracy**.
- Shipped **Streamlit** and **Power BI** dashboards; followed Git branching, pull-request reviews, and agile ceremonies in a 4-person team.

PROJECTS

AI Cold Caller Simulator

2026

Python, FastAPI, Gemini, ElevenLabs, Sarvam STT

- Built Python/FastAPI backend for a voice-based sales training simulator handling 7+ conversation flows at **<800ms response latency**.
- Implemented state-machine conversation logic, retry/error handling for external APIs, and pytest unit tests for the integration layer.

DialoGen — Voice Conversation Platform

2025

Python, FastAPI, RabbitMQ, Docker, Twilio, Pipecat, Next.js, Prisma, PostgreSQL

- Co-architected **7-microservice Python platform** with a RabbitMQ message bus for inter-service communication; reduced cross-service latency by **~40%**.
- Engineered Twilio + Pipecat integration layer with automatic reconnection, exponential backoff, and structured JSON logging for production debugging.

AI-SDR — Sales Development Platform

2025

Python, FastAPI, Next.js, TypeScript, Prisma, PostgreSQL, RabbitMQ, Docker, Azure Pipelines

- Designed multi-tenant Python backend with **FastAPI + Prisma ORM**; built REST APIs for lead management, campaign orchestration, and scheduled jobs across **3+ tenants**.
- Implemented role-based access control, request validation with Pydantic schemas, and CI/CD pipelines on Azure DevOps with automated test gates.

Golden Hardwares — Inventory & Sales Web App

2026

Next.js 14, TypeScript, Tailwind CSS, Supabase (Postgres, Auth, RLS)

- Built full-stack TypeScript web application with Next.js 14 App Router and Supabase Postgres backend managing **200+ SKUs**.
- Implemented secure Row-Level Security policies, REST data layer, bill printing, and responsive Tailwind UI; deployed serverless on Vercel.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL
Python Stack	FastAPI, Flask, Pydantic, Pandas, NumPy, pytest, asyncio, requests, SQLAlchemy
Backend / APIs	REST APIs, Microservices, RabbitMQ, Prisma ORM, OAuth, JWT, OOP, Design Patterns
Frontend	Next.js 14, React, Tailwind CSS, Streamlit, HTML/CSS
Cloud / DevOps	Azure (Pipelines, DevOps), Docker, Git, GitHub, CI/CD, Vercel, Linux
Databases	PostgreSQL, Supabase, MongoDB
Practices	Agile / Scrum, Test-Driven Development, Code Review, Software Debugging, SDLC

EDUCATION

B.Tech, Computer Science & Engineering — Jyothi Engineering College, Thrissur (KTU) (16 years full-time education) 2021 – 2025

CERTIFICATIONS

Data Science Professional — Luminar Technolab | Python for Data Science — Coursera
